Forecast for Thursday 27 May 2021

Weather: Chilly with some patches of fog in valleys in the morning, though it will be clear on hill sides. Then, a sunny day across the region with high UV levels and light winds. In the evening cloud cover will increase with the risk of some spots of rain overnight.

Chance of cloud free mountain/hill tops above 600m: 100%

Visibility: Excellent throughout the day, though poor in valleys in any fog to start. In the evening visibility will deteriorate slightly as cloud cover increases and sunshine turns hazy.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

It will be a dry and sunny day, so ensure you are protected from the sun in the hills throughout the day. It will be chilly first thing though so layers are recommended in the morning.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Thu 27 May 2021	0.2mm	1mm	5.8mm

Forecast for Friday 28 May 2021

Weather: A cloudier day with some outbreaks of rain throughout the day and into the overnight period, it will feel much cooler under the cloud cover and in any persistent periods of rain compared to the previous day.

Maximum wind: South-westerly 10mph gusts of 17mph.

Chance of cloud free mountain/hill tops above 600m: 90% decreasing to 60% throughout the day.

Visibility: Generally good with cloud bases around 900m throughout the day, patches of cloud at 500m will often cover hill tops especially during periods of more persistent rain later in the day, reducing visibility to poor.

Temperature: **Valleys:** Plus 10 Celsius becoming Plus 14 Celsius.
At 600m: Plus 7 Celsius.
Freezing level: Above the summits.
